· MEMORANDUM FOR NATIONAL FOREIGN INTELLIGENCE BOARD

SUBJECT   :   Resource Requirements for APEX Implementation

1.   There are indications from the Intelligence Community that imple-
mentation of the APEX Special Access Control System will have resource
implications which could be quite substantial. The APEX System requirements
for document control and, to a lesser degree, sanitization, have been cited
as requiring extensive amounts of manpower and money. In addition, resources
will be required for decompartmentation and the conversion, over time, of
computer and communication systems.   25X1

2.   The DCI has decided that APEX funding requirements will be ranked
within the minimum NFIP Guidance level. However, no adjustment to guidance
has been provided to accommodate this initiative. Therefore, please review
once again, as carefully as possible, your anticipated needs for additional
resources to put APEX into effect. Decision packages to reflect these
resources are to be submitted to the D/DCI/RM by 15 October 1980. The
procedures for document control are prescribed in the APEX Manuals for
Government and Industry. Sanitization and decompartmentation procedures will
be forthcoming from COMIREX and the SIGINT Committee, but probably will not
be available before budget submissions are due. Both committees will provide
as much guidance as possible regarding anticipated procedures. The document
control and accountability features of the APEX System are essential to the
Presidentially directed effort to enhance the protection of highly sensitive
imtelligence programs. To the extent practicable, you are·urged to utilize
existing resources devoted to the security of classified and Sensitive
Compartmented Information (SCI) to implement APEX.   25X1
